

ORN Journal - Guidance Notes to Authors

The ORN Journal is distributed free of charge by email to policy and operations staff working in the field of outdoor recreation as well as academics and private consultants with an interest in outdoor recreation. The style and content of articles is less formal than that which could be expected in an academic journal.

Format

The preferred length of papers is between 500 and 2,000 words.

Please also include photos, diagrams and charts. Include details of the photographer or whoever should be credited for the images. The images need to be in high quality jpeg or tiff format and not embedded into a word document. Please remember to provide any appropriate titles for the article and include headings where necessary. Images can really bring the journal to life – please consider your photo submissions carefully.
